

Presents:

TL-Pro Design Studio Training

February 28-March 1, 2012

Hosted At:

Trimble – Energy Solutions

2310 North Molter Road Suite 200
Liberty Lake, Washington 99019

Take the opportunity to experience the higher standard in Overhead Line Design Software All Participants qualify to receive a free 60day full function evaluation copy of TL-Pro Design Studio

Who should attend?

Engineers and technicians who demand a higher standard from their design software, and who seek an easy-to-use, intuitive software system that has practical applications to meet today’s real-world line design challenges.

Topics include:

- ✓ **Managing terrain and survey data**
- ✓ **Siting and modeling techniques**
- ✓ **Use of multiple design scenarios to easily evaluate wood, steel, and concrete alternatives**

- ✓ **Evaluate alternative alignments**
- ✓ **Advanced conductor sag/tension design and analysis**
- ✓ **Building and editing structures for your data libraries**
- ✓ **Creating Material libraries, and generating parts lists from a project**
- ✓ **Design analysis**
- ✓ **Structural analysis of wood, steel, sectional steel and concrete structures**
- ✓ **Clearance and Separation Analysis**
- ✓ **Export to Google Earth**
- ✓ **Many other great features provided only in TL-Pro**

Course Materials will be provided for each registrant.

Course Instructor:

Yair Berenstein, P.E., MSCE

***Stay and Ski
Friday, March 2nd and
lunch is on us!***
